

Tech in Motion Supporting File Two

Please see below for video testimonials, panels, webinars, and demos on virtual clinical experiences from AMOopportunities.

At the [link here](#), you will find a video playlist of AMO visitors (what we call our customers) talking about their experience with virtual rotations.

At the [link here](#), you will find a video playlist of our preceptors talking about their virtual rotations and showing demonstrations of what medical trainees can expect.

At the [link here](#), you will find a panel with AMO Ambassador Jose and AMO Advisors Ryan and Antoine discussing the role virtual rotations can play in medical education. During the hour-long discussion, they provide a high-level look at how virtual rotations can give medical students an edge when applying for residency or in their practice of medicine in the future. Jose also provides details on the virtual plastic surgery rotation he was participating in at the time.

At the [link here](#), you will find a panel of AMO physicians Dr. Lin and Dr. Albert (both who host virtual rotations), along with IMG Austin Chen, who is now a resident at Mayo Clinic, and AMO COO Ben Bradley, talk about the benefits of virtual rotations.

At the [link here](#), you will find a playlist of videos from the webinars we host for international medical students and graduates to learn more about our in-person and virtual clinical experiences. In the 38 videos, you will find 10 videos on AMO virtual rotations.
