

PERSONALIZED LEARNING ENVIRONMENT

The thing about a four-year education is that it can seem long in the beginning, but often goes by in the blink of an eye. Our promise to you is that we'll never leave you on your own to figure it out. The Rollins approach to a personalized learning environment takes advantage of every moment to maximize engagement. We value hands-on research over rote memorization, mentorship over prescriptive lectures, and experiential learning above all else. Our advisors equip every incoming first-year student with a roadmap for finishing their degree in four years, backed by consistent monitoring and support throughout the Rollins experience. It's part of our Finish in Four promise, which ensures that you'll get the most out of your time here.

Personalized Preparation

Inside and outside the classroom, you'll forge relationships with fellow students, successful alumni, and expert faculty deeply invested in your personal and professional development.

Students Who Had a Mentor are Twice as Likely to Thrive

Our professors know a lot, starting with your name

You'll forge lifelong relationships with our expert professors through our intimate, discussion-based courses and one-on-one advising. That student-faculty bond is strengthened while working side by side on everything from original collaborative research to life-changing service projects and globetrotting field studies.

The home of engaged learning

With an average class size of just 17, our personalized learning environment is designed to maximize engagement and support, and thanks to our 11:1 student-faculty ratio, our professors have the freedom to focus on you. It's little wonder then that *U.S. News & World Report* ranked Rollins the No. 1 college in the South for undergraduate teaching in 2020 and 2021.

Mentors Matter Most

A recent Gallup report reveals that college graduates who had a professor who cared about them as a person, made them excited about learning, and encouraged them to pursue their dreams were twice as likely to thrive in their lives and careers. From expert faculty and alumni to peer mentors and dedicated advisors, you're never alone on your Rollins journey.

"From day one at Rollins, my professors cared about my interests, about me as a person. They implored me to reach out and explore, to get outside my comfort zone, where they knew I'd develop not just technical skills, but communication, problem-solving, and people skills. Because of this, I was able to become a leader both in my major and beyond."

Lauren Neldner '20
2019 Goldwater Scholar

Great Guides

Our professors are more than the South's most committed teachers. They're also fascinating human beings who employ everything from superheroes to prestige TV to capture your imagination.

NOVEMBER 16, 2018
Music Lessons

Computer science professor Dan Myers' penchant for music has played an instrumental role in his development as both a scientist and a teacher.

MAY 23, 2018
The Fantastic Dr. Fuse

Rollins physics professor Chris Fuse parlayed his love of the fantastical into a career in science and now uses that passion to inspire his students.

APRIL 16, 2018
The World's Most Relatable Professor

From first-year students to fraternity brothers, English professor Jana Mathews shares something in common with just about everyone on campus.

See for Yourself
