

Robert P. Madison International, Inc.

Nomination – The Twenty Five Year Design Award  
June 26, 2018

Twenty Five years ago, the Aerospace Institute was completed and signaled a new era in advanced university research, communication and applied science for Ohio Universities, residents, visiting scholars, government and private agencies.

The design of the building is a dynamic reflection of its purpose, its avant-garde conceptual approach to space and the future and has made a meaningful contribution to the environment as sculpture, with a visual impact that inspires the imagination.

Today it has fulfilled that promise and the structure speaks loudly to the community with stability and as an architectural “tour de force” that is a very positive statement about Architecture that is well designed.

I recommend the Aerospace Institute for the Twenty Five Year Design Award.

Thank you very much.
